

Pietra & Dreaming 30 x 60

Large formats are a constantly growing segment. Collections with stone and concrete industrial patterns are getting more and more popular among consumers. Opoczno presents two new collections of glazed porcelain tiles in 29x7 x 59,8 format in grey and beige shades for those who value naturally looking surfaces.

Tiles from PIETRA collection are characterized by bumpy surface of slate stone structure. They are available in four colours. Beautiful earth tone base tiles are complemented with mosaics of the same colors as well as structural tiles.

DREAMING is a four tiles collection in calm greys and beiges. Precise and smooth design of concrete goes perfectly with contemporary interiors and architecture.
